MASTCLIMBING

BFT120 Mastclimber
Medium Duty

BFT120 Mastclimber

Medium Duty

Easily the most versatile in our fleet, the BFT120 Mastclimber is regularly used for light, medium and heavy-duty applications. It operates at up to 120m and when configured as a twin-mast, carries loads of up to 3,500kg.

Single-mast? Twin? The BFT120 Mastclimber can be configured both ways. And thanks to BFT's unique modular decking system, this machine gives a truly variable workspace area.
